Professional Experience

Internal Audit Internship – J.R. Simplot Company: June 2017 to November 2017

- Traveled to various retail and food plant locations within the company to conduct on-site audits.
- Worked together with external auditors and company management to gather test work and documentation around general controls, revenue, and accounts payable.
- Assisted in the planning and implementation of IT audit projects such as cloud assessments, firewall administration, and third-party access.
- Used analysis tools such as QlikView and Power BI to generate financial reports for the audit committee.

Web Developer -- Research Software Facility at Colorado State University: January 2015 to April 2017

- Implemented critical thinking and problem solving skills to analyze pre-existing code to revolve bugs/defects.
- Utilized team building and effective communication skills when meeting with project coordinators to determine feasible and efficient project requirements.
- Coordinated with professors and scientists to map out and create database structures using SQL.
- Designed graphical user interfaces for web applications on the .NET Framework.

Business Development Representative -- Agworld Incorporated: August 2014 to January 2015

- Used conversational and relational techniques to sell farm management software and provide practical solutions for farming/ranching operations.
- Worked cross functionally with team members to strategize how to achieve monthly sales goals and increase profitability.
- Acted in a customer support role to assist customers with any questions or difficulties they had with the software.

MBA Coursework

- **BUS 626:** Analyzed previous balance sheets, income statements, and cash flow statements to make recommendations for future profitability of a company.
- **BUS 601:** Collected high quality business data, analyzed it using statistical methodology, and made well informed business decisions based on these inferences.
- **BUS 650:** Explored various aspects of supply chain management such as forecasting, systems integration, interdepartmental collaboration structures, and being able to develop an innovative mindset to improve efficiency.
